

bid Utility Rebates

Comprehensive rebate administration services for energy-efficient projects and construction.

bid Utility Rebates are services available to clients across the United States and Canada. bid Rebates team takes over the complex and time-intensive rebate acquisition process: from early-stage budgeting and guidance through to pre-approvals, site inspections, final applications, and check expediting.

It's a perfect outsourced alternative for high-volume and/or high-velocity efficiency upgrades, and can relieve the burden for energy, construction and facility departments who just don't have the time to chase rebates.

Maximize your Return on Investment.

By identifying rebates in advance, you will understand the full Return on Investment before your initiative is even approved to move forward. This makes CapEx dollars go further and enables your team to factor rebates into your site selection and your roll-out schedules. When leveraged proactively, rebates effectively add to your budget, enabling you to do more projects and achieve more savings.

Make the most of your capital.

If you're looking to make the best use of your capital and operating dollars, capturing rebates and incentives is an effective way to accelerate the payback on energy-efficient new construction and retrofit projects.

Key Features and Benefits

Early-stage budget consulting

Project scheduling and implementation guidance

Comprehensive end-to-end application management

Pre-approval confirmations

Utility site-inspection coordination

Custom rebate and incentive negotiations

Check expediting

Trusted and experienced team who have successfully processed more than 250,000 energy-efficiency related projects.

Utility Rebates covers your administrative rebate functions.

From early-stage budget consulting around project scheduling and implementation, right on through to the comprehensive end-to-end application management, we've got you covered.

bid will review your project scope and site list to determine which sites are eligible for the best rebates and should be prioritized first. Using this approach will fund additional projects and further reduce the total cost of ownership.

Once your site list has been finalized, bid will help you optimize your schedule around completing projects quickly, making sure that you do not miss any rebate submission deadlines. This optimization process will enable you to reinvest rebate revenue back into your budget, and fund more projects. It will also protect you, should a rebate program close or reduce pay-outs unexpectedly.

The comprehensive end-to-end application management service ensures that once your initiative is approved and your site list is complete, the entire rebate filing and management process will be covered.

About bid

An experienced and knowledgeable Rebates Solution Provider.
